## **FT** 5

# Diffuse reflection light scanner with Fading

1 ... 280 mm

- Diffuse reflection light scanners with fading
- V-optics allow for reliable detection of dark objects in the short range
- Scanning range adjustment via teach-in
- Visible red light
- Active suppression of extraneous light A<sup>2</sup>LS
- Fast alignment through brightVision®
- Simple mounting with integrated M3 metal threaded sleeves
- Compact installation possible due to cable outlet at the rear or bottom
- Full control through green and yellow indicator LEDs
- Robust plastic housing acc. to IP 67 for industrial application

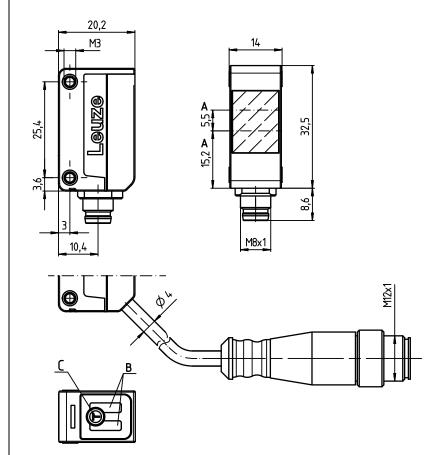

## **Accessories:**

#### (available separately)

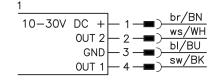

- Mounting systems (BTU 200 ..., BT 200...)
- M12 connectors (KD ...)
- Ready-made cables (K-D ...)

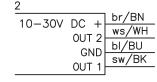

# **Dimensioned drawing**

- A Optical axis
- **B** Indicator diodes
- C Teach button

## **Electrical connection**

## FT<sub>5</sub>

# **Specifications**

**Optical data** 

Scanning range limit 1) 1 ... 280mm Scanning range 2) see tables Light source LED (modulated light) Wavelength 620nm (visible red light)

Timing

Switching frequency 500 Hz Response time 1ms ≤ 300 ms Delay before start-up

**Electrical data** 

Operating voltage U<sub>R</sub> 10 ... 30VDC (incl. residual ripple) Residual ripple  $\leq$  15% of U<sub>B</sub> Open-circuit current

≤ 20mA 2 PNP transistor outputs .../4P... Switching output

pin 2: PNP dark switching, pin 4: PNP light switching 2 NPN transistor outputs

.../2N...

pin 2: NPN dark switching, pin 4: NPN light switching

≥ (U<sub>B</sub>-2.5V)/≤ 2.5V max. 100 mA <sup>3)</sup>

Signal voltage high/low Output current

**Indicators** 

Green LED ready

Yellow LED reflection (object detected)

Mechanical data

Connection type

Housing plastic plastic 20g with M8 connector Optics cover

Weight

40g with 200mm cable and M12 connector

70g with 2m cable

M8 connector, 4-pin cable 200 mm with M12 connector, 4-pin cable 2m, 4x0.20 mm<sup>2</sup>

**Environmental data** 

Ambient temp. (operation/storage) Protective circuit 4) -40°C ... +60°C/-40°C ... +70°C 2, 3 III VDE safety class Protection class **IP 67** exempt group (in acc. with EN 62471) IEC 60947-5-2 Light source

Standards applied

1) Scanning range limit: typical scanning range

Scanning range: ensured scanning range
Sum of the output currents for both outputs, 50 mA when ambient temperatures > 40 °C

2=polarity reversal protection, 3=short circuit protection for all outputs

# Fading: black/white error < 50%

#### **Example:**

Adjustment 160mm, white 90%

Detection:

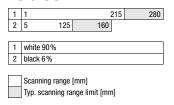

Black object, 6%, is detected at approx. 100mm

Adjustment 120mm, white 6%

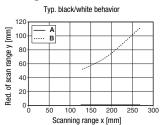

Situation in the background:

White object, 90%, is no longer detected at a distance > 200mm

## **Tables**

# **Diagrams**

A white 90%

B black 6%

#### Remarks

## Approved purpose:

This product may only be used by qualified personnel and must only be used for the approved purpose. This sensor is not a safety sensor and is not to be used for the protection of persons.

With the set scanning range, a tolerance of the scanning range limits is possible depending on the reflection properties of the material surface.

		Designation	Part no.
With 4-pin M8 connector			
	Pin 4: PNP light switching, pin 2: PNP dark switching	FT 5.3/4P-M8	50122572
	Pin 4: NPN light switching, pin 2: NPN dark switching	FT 5.3/2N-M8	50122575
With 200mm cable and M12 connector			
	Pin 4: PNP light switching, pin 2: PNP dark switching	FT 5.3/4P-200-M12	50122574
	Pin 4: NPN light switching, pin 2: NPN dark switching	FT 5.3/2N-200-M12	50122577
With cable, cable length 2m			
	Pin 4: PNP light switching, pin 2: PNP dark switching	FT 5.3/4P	50122573
	Pin 4: NPN light switching, pin 2: NPN dark switching	FT 5.3/2N	50122576
	PIN 4: NPN light switching, pin 2: NPN dark switching	FI 5.3/2N	50122576

# Part number code

-M8 M8 connector, 4-pin
N/A Cable, standard length 2m
-200-M8 200 mm cable with M8 connector
-200-M12 200 mm cable with M12 connector

# **Teach process**

Teach	Operating level 1	Operating level 2
Standard Teach	Teach on object:	Teach on background:
	In this teach version, the switching distance is set so that the object that is in the beam path during the teach is detected with a tight reserve. The additional distance by which the scanning range is increased in relation to the distance to the teach object is designated as reserve <b>R</b> . All objects up to a bit above the distance of the object used in the teach are thus detected.	This teach is only suitable for applications with a fixed background. The teach is carried out without an object. The scanning range is placed in front of the teach object with reserve <b>R</b> . The scanning range is set by the teach so that detection stops just short of the background.
	Switching output R	Switching output

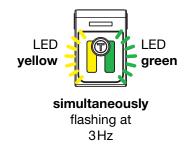

FT<sub>5</sub>

## Operation via teach button

#### Teach in operating level 1

- Press teach button until both LEDs flash simultaneously.
- Release teach button.
- Ready.

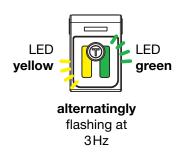

#### Teach in operating level 2

- Press teach button until both LEDs flash alternatingly.
- Release teach button.
- Ready.

## Adjusting the switching behavior of the switching output – light/dark switching

This function permits inversion of the sensors' switching logic.

 Press the teach button until only the green LED flashes. The yellow LED then shows the inverted switching logic:

ON = switching outputs light switching

(in the case of complementary sensors, Q1 (pin 4) light switching, Q2 (pin 2) dark switching), this means output active when object is

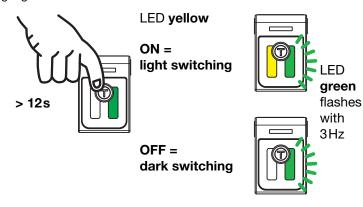

detected.

**OFF** = switching outputs dark switching

(in the case of complementary sensors, Q1 (pin 4) dark switching, Q2 (pin 2) light switching), this means output inactive when object is

detected.

- Release teach button.
- Ready.
