## HRTR 46B Ex n

# Diffuse reflection light scanner with background suppression

5 ... 1,800mm 800mm with black-white error < 10%

- Adjustable scanner with background suppression
- Reliable detection of light and dark, as well as inclined or sloped surfaces
- Exact scanning range adjustment through multiturn potentiometer
- Fast alignment through brightVision<sup>®</sup>
- Fast connection through Ultra-Lock™ fast locking
- A<sup>2</sup>LS Active Ambient Light Suppression
- Complementary switching outputs for optimal adaptation to the application
- (Ex) II 3G Ex nA op is IIB T4 Gc X
- (Ex) II 3D Ex to IIIC T90°C Dc IP67 X

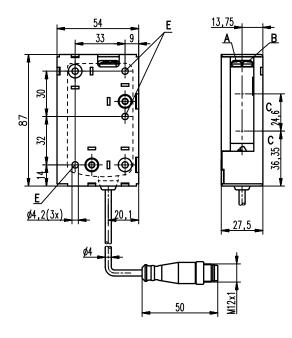

### **Accessories:**

### (available separately)

- Mounting systems (BT 46, BT 46.1, BT 46.1.5, BT 46.2)
- M12 connectors (KD ...)
- Ready-made cables (K-D ...)
- Interlocking guard K-VM12-Ex (Part no. 501 09217)

# **Dimensioned drawing**

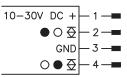

- Green indicator diode Α
- В Yellow indicator diode
- С Optical axis
- D Scanning range adjustment
- Е Fastening hole

### **Electrical connection**

HRTR 46B/66, 200-S12 S-Ex n

**Environmental data** 

Ambient temp. (operation/storage) -30°C ... +60°C/-40°C ... +70°C Protective circuit 2, 3 VDE safety class 7) II, all-insulated Protection class IP 67, IP 69K LED class (in accordance with EN 60825-1)

Standards applied

**Explosion protection** (Ex) II 3G Ex nA op is IIB T4 Gc X Certification (CENELEC)

- Typ. scan. range limit: max. achievable scanning range for light objects (white 90%)
- Scanning range: recommended scanning range for objects with different diffuse reflection
- For UL applications: for use in class 2 circuits only
- The push-pull switching outputs must not be connected in parallel
- Model "S"=standard housing, model "W"= with lateral flange 2=polarity reversal protection, 3=short circuit protection for all outputs
- Rating voltage 50VAC

#### Remarks

## Approved purpose:

This product may only be used by qualified personnel and must only be used for the approved purpose. This sensor is not a safety sensor and is not to be used for the protection of persons.

With the set scanning range, a tolerance of the upper scanning range limit is possible depending on the reflection properties of the material surface.

#### Ex devices

## Notices for the safe use of sensors in potentially explosive areas

This document is valid for devices with the following classifications:

Device group	Device category	Equipment protection level	Zone
II	3G	Gc	Zone 2
II	3D	Dc	Zone 22

#### Attention!

- Check whether the equipment classification corresponds to the requirements of the application.
- The devices are not suited for the protection of persons and may not be used for emergency shutdown purposes.
- A safe operation is only possible if the equipment is used properly and for its intended purpose.
- Electrical equipment may endanger humans and (where applicable) animal health, and may threaten the safety of goods if used incorrectly or under unfavorable conditions in potentially explosive areas.
- The applicable national regulations (e.g. EN 60079-14) for the configuration and installation of explosion-proof systems must be observed without fail.

#### **Installation and Commissioning**

- The devices must only be installed and commissioned by trained electricians. They must be aware of the regulations and operation of explosion-proof equipment.
- To prevent unintentional separation under voltage, devices with connector (e.g. Series 46B) must be equipped with a safeguard or a mechanical interlocking guard (e.g. K-VM12-Ex, part no. 50109217). The warning sign "Do not disconnect under voltage" that is supplied with the device must be attached to the sensor or its mounting bracket so that it is clearly visible.
- Devices with terminal compartment lid (e.g. Series 96) must only be commissioned if the terminal compartment lid of the device is properly sealed.
- Connection cables and connectors must be protected from excessive or unintended pulling or pushing strain.
- Prevent dust deposits from forming on the devices.
- Metallic parts (e.g. housing, mounting devices) are to be integrated into the potential equalization to prevent electrostatic charge.

#### **Maintenance**

- No changes may be made to explosion-proof devices.
- Repairs may only be performed by a person trained for such work or by the manufacturer.
- Defective devices must be replaced immediately.
- Cyclical maintenance is generally not necessary.
- Depending on the environmental conditions, it may occasionally be necessary to clean the optical surfaces of the sensors.
   This cleaning must only be performed by persons trained for this task. We recommend using a soft, damp cloth. Cleaning agents that contain solvents must not be used.

#### **Chemical resistance**

- The sensors demonstrate good resistance against diluted (weak) acids and bases.
- Exposure to organic solvents is possible only under certain circumstances and only for short periods of time.
- Resistance to chemicals must be examined on a case by case basis.

#### **Special conditions**

- The devices must be installed in such a way that they are protected from direct exposure to UV rays (sunlight).
- Static charge on plastic surfaces must be avoided.
